A very nice game of horror, if you like getting scared, this game is worth it 9 to 10. Played it with a buddy over the weekend and had to get it myself.

Just a fun game with cool characters. Loads of cool gimmicks like the special moves with the sentences of the presidents to their times. Pretty balanced. Great game, for the price a steal as you get a bundle of fun.

. I unchecked this DLC so I no longer have to see the trash that are Reptile and Ermac costumes. Good thing I didn't pay for this pack separately, it was included in MKXL. Awesome game, super fun to play with a friend (Though the single player is perfectly fine, you're missing out if you don't play coop!) Lots of visual polish, and everything you do has oomph. The controls take some getting used to, though that's mostly because coordinating with player 2 is necessary to get anywhere. They really get a lot of mileage out of the dual control mechanic, as it includes everything from movement, to minigames, and even dialogue choices! Have I mentioned this game is hilarious? Definitely recommended.. I'm learning these songs so that when it comes time to marry her I'll play these at our wedding

9/10 would marry Avril Lavigne. For the accessible methods made possible by RPG Maker softwares, these game products can be a hit-or-miss due to its technical limitations and easy making. Playing through the first half hour of The Albino Hunter, I was afraid that this would have proven the worse case due to familiar stock soundtracks and certain resources.

Going further still and past the demo length of the game, I've grown accustomed to the game's nature. What kept me going was its elaborate dialogue writing, the humor and its fourth-wall tropes. These are the strengths that help define it more as an adventure game rewarding exploration with turn-based combat coming by the player's choice or part of a story, rather than being overly present during exploration as standard JRPG games do.

I'm glad I didn't give up playing during the linear beginning part because as the game progresses, free reins are given to find new quests of different sorts; which upon completion get rewarding practically but primarily story-wise. Many characters are memorable and every one of them have their own quirks that add to the game's humor value. It shows that the dev team Cherry Co. Studios made this game with care, judging by the rich and enticing dialogues put into it while not shying from poking fun at both themselves and the JRPG tropes. They also show signs of activity in improving and fixing bugs in their game because, even at its flawed state, it's already fun and satisfactory as a whole.

Awesome mod! It greatly improves gameplay. A must together with Eternal Lords expansion.. It's a good'un. I wish it focused on human enemies (many weapon skills are useless on demons), and less complicated upgrade system for weapons. I also DO NOT like the distracting ki spark system at all, which is necessary to master in order to quickly regain stamina. That said, it looks and plays great and there's a ton of weapons and armor, and several unique fighting styles.. I was imagining sort of software which provide to watch something during coding. And I realised that someone already imagined it and made it real. I really like this software.. This is a great escape room-ish adventure. Definite buy when released.

No jump scares in a horror game = instant buy.. I'm not fan of this type of game but I love this little game it's really relaxing game with great achievements for low price:)

- add more rounds

- maybe fix up settings a bit. I like the idea of the Iranian planes, however I've played thousands of games and this one by far has the worst controls I have ever seen. Graphics average. Music boring. User XP is very bad. Allies and enemies have similar rectangle colors. Sometimes you don't see the aim. You can't lock from far away and you have to get really close. The time window to lock an enemy is just a few ms. The chance to lock an enemy gets even smaller with the high sensitivity of the controls (which can NOT be adjusted). I wouldn't recommend this game to anyone unless they've been paid to play it.. Beautifully done, retro style game. Very challenging, I couldn't stop until it was done. Do your part. Join Captain Super Mustache in a journey to save Uranus.

Very happy to have completed this game and hope this helps anyone trying to play.

Brought me back to my days as a kid playing Super MAario Bros. Loved it.

[Sorry about the poor quality graphics. I'm still working out which recording software to use.](#)

[The game itself has much better graphics then this video shows.. Short and not challenging.](#)

[The walking / running is quite slow tho. I hope the maker of the game will improve all this.. Not that good. I haven't beaten this game yet but so far it's quite good. I'm writing a review early because it's a travesty that this game has so few reviews: I intend to update it later. But I've played enough to know the positive rating is deserved.](#)

[Simply put, if you like Zelda you will probably enjoy this game.](#)
